Technical Skills

Languages: C, C++, Python, JavaScript

Databases: MySQL, MongoDB

Framework/Libraries: TensorFlow, Keras, Streamlit, React, Flask

Tools: Git, Github, Visual Studio, Jupyter, Docker, Firebase

Concepts: Data Structures and Algorithms, System Design, Object-Oriented Programming, Machine Learning

Internship

Machine Learning Intern, Atharvo

Aug 2024 - Sep 2024

- Implemented data preprocessing techniques, including categorical variables encoding and handling missing values, to improve the accuracy of the model.
- Developed a machine learning application using a Support Vector Classifier (SVC) to predict depression based on personal, demographic, and social factors, integrating Flask for the web interface.

Projects

High Frequency Trading System

- Engineered a high-frequency trading system in C++ leveraging Kite Broker's API, achieving real-time market data access and reducing latency by 150 ms for faster trade execution.
- Engineered a low-latency order book in C++, processing 10,000+ orders per second with 99.99 accuracy by implementing lock-free data structures and asynchronous processing, enhancing trading platform efficiency.
- Tools used: C++, Boost, Protobuf

Skin Disease Classification

skin-disease.streamlit

- Developed a CNN model for skin disease classification using a diverse dataset, achieving high accuracy and F1 score through data augmentation and model fine-tuning.
- Tools used: Python, Tensorflow, Flask

Black Scholes Option Price

blackscholesoption.streamlit

- I developed an interactive Black-Scholes pricing dashboard in Python, visualizing call/put option prices with real-time spot price and volatility adjustments using yfinance, numpy, and matplotlib.
- Tools Used: Python, Numpy, Streamlit, Scipy

Education

Lloyd Institute of Engineering and Technology, B.Tech. in Computer Science and Engineering

Sep 2021 – May 2025

- CGPA: 7.5/10.0
- **Coursework:** Data Structures and Algorithms, Operating Systems, Computer Networks, DBMS, Computer Architecture, Computational Theory

Achievements

- Won 1st place in a 24-hour Code-A-Thon at Lloyd Institute of Engineering and Technology, demonstrating strong problem-solving and coding skills under tight deadlines.
- Mastered advanced data structures and algorithms by solving 480+ LeetCode problems, increasing speed and efficiency in coding challenges.
- Achieved a Pupil rank with a 1224 rating on Codeforces, demonstrating strong competitive programming skills and algorithmic expertise.
- Completed 200-hour DSA training, boosting coding efficiency in competitive programming through advanced problem solving techniques.

Certifications

- JP Morgan Software Engineering Job Simulation
- Goldman Sachs Software Engineering Virtual Experience
- Cisco Networking Essentials
- Infosys Foundation Finishing School for Employability Program
